Barre
Barres de toit en lots de deux. En acier ou en aluminium. Pour plus d'informations, voir p. 4-5.

Pied + Adaptateur Toit Court (SRA)
Pieds en lots de 4. Pour plus d'informations, voir page 6. SRA est un adaptateur pour certains véhicules 3 portes avec un toit court qui augmente la distance entre les deux barres. (Utilisé seulement sur quelques modèles de voiture et uniquement avec le Thule Rapid System 754).

Kit
Kit de barre de toit en lots de 4. Pour un ajustement parfait du pied de la barre au toit du véhicule.

Si une lettre figure dans la colonne Info, recherchez sa signification ci-dessous.

i Information importante concernant votre barre de toit, voir le tableau sur la droite.

A Charge maxi du véhicule (poids des barres inclus) 30 kg

B -ıı- 40 kg

C -ıı- 50 kg

D -ıı- 60 kg

Si la colonne est vide, la capacité de charge est supérieure à 60 kg. Veuillez vérifier les instructions de montage pour plus d'informations.

H La distance entre les barres de toit ne permet pas l'installation d'un coffre de toit.

K Des trous de fixation doivent être percés dans le toit.

L Une seule barre de toit peut être fixée sur le véhicule.

M Sans trous de fixation dans le cadre de porte.

N La barre WingBar Edge présente un profil surbaissé élégant. Il faudra par conséquent être prudent lors de la fixation des accessoires supplémentaires, comme les coffres de toit, de manière à ne pas venir en contact avec les fixations existantes (comme des antennes) sur le véhicule.

Dans certains cas, nous proposons des solutions alternatives complètes.

Smart Rack

› Porte-vélos sur hayon arrière Thule

Ces porte-vélos sont faciles à replier et à monter sur le hayon arrière grâce au système de fixation rapide. Les bras de fixation recouverts d'une gaine en caoutchouc verrouillent fermement le vélo en place tout en protégeant le cadre. Lorsqu'il n'est pas utilisé, repliez simplement le porte-vélos avant de le ranger dans la voiture ou au garage. Pour ceux qui souhaitent transporter les vélos à l'intérieur du véhicule, nous proposons également une solution ingénieuse.

Nous avons testé spécifiquement chaque véhicule recommandé

Si votre véhicule ne figure pas dans ce guide :
1. Il est équipé d'un spoiler en plastique/fragile/volumineux
2. Il est équipé d'un hayon arrière en plastique ou en deux parties
3. Le constructeur ne permet pas l'adaptation de porte-vélos sur le hayon arrière
4. Il vient d'être commercialisé (depuis moins de 6 mois)

Consultez notre site Web ***www.thule.com***

Les constructeurs automobiles commercialisent leurs modèles avec des options différentes selon les pays (une partie chromée ou un spoiler peut être, par exemple, ajouté au hayon arrière). Du fait de la fragilité des spoilers en plastique, il n'est pas possible d'installer de porte-vélos sur les hayons arrière de ces véhicules, même s'ils sont recommandés dans ce guide. Thule met tout en œuvre pour prendre ces éléments en compte mais ne peut être tenu responsable de ces particularités locales.

Recherchez la marque, le modèle, le type et l'année de la voiture.	Voici le modèle de porte-vélos Thule qu'il vous faut.	Pour installer cet accessoire sur votre véhicule, un kit d'adaptation peut être nécessaire avec certains porte-vélos.	Cette colonne vous indique si vous avez besoin d'un adaptateur pour augmenter la capacité du porte-vélos.	Si la serrure pour les vélos n'est pas incluse, nous vous recommandons d'utiliser le câble antivol Thule 538.	Selon le modèle du véhicule, les feux arrière et les clignotants, ainsi que la plaque d'immatriculation, peuvent être masqués. Dans ce cas, nous vous recommandons d'utiliser notre plaque de signalisation électrique Thule 976 pour les remplacer.

› Sécurité

Des essais sans concession pour des chemins extrêmes.

On ne sait jamais dans quelle aventure vous allez embarquer vos équipements. C'est pourquoi nous développons nos produits afin qu'ils résistent à toutes les conditions climatiques, toutes les températures et tous les terrains dans le monde entier. Pour nous, c'est la seule conception possible. Imaginez à quoi ressemble notre centre d'essais ! Chaque nouveau produit est soumis aux températures glaciales du Grand Nord, aux chaleurs torrides du désert, à de longues sessions de rayons UV intensifs, à une chambre de projection saline pour sa résistance à la corrosion, ainsi qu'à une batterie de tests de pression et de charge. Enfin, une machine le malmène pendant une éternité, simulant deux voyages autour du monde en moins d'une semaine. Certes, c'est un peu brutal. Mais c'est ainsi que tourne le monde. Et comme nous n'octroyons notre certification qu'aux produits qui ont affronté le monde entier (et y ont survécu), il n'est pas étonnant que nous soyons le leader mondial en matière de sécurité et de durabilité. Nous allons même au-delà des normes établies.
